

**Research & Administrative Workspace Lockers**

<b>Technical specification for Research &amp; Administrative Workspace Lockers</b>	
research workspace locker "type"	res
research workspace locker mount path	/afs/eos/lockers/research
administrative workspace locker "type"	adm
adm. workspace locker mount path	/afs/eos/lockers/admin
<b>pts groups</b>	
admin group	any group owned by ownerID, or system/dept admin group - specified at locker request time default: ownerID-admin
staff group	any group owned by the specified admin group - specified at locker request time default: ownerID-admin:staff
<b>container volume</b>	
container volume name	{res, adm} . [dept] . [name]
container mount point	/afs/eos/lockers/{research, admin}/[dept]/[name]
container volume permissions	system:administrators      rliwdka system:authuser              l itecs-admin:lockeraudit      rl [ownerID]                      rl [admin group]                  rl
<b>sub volumes</b>	<b>types: {private, public}</b>
<b>private volumes</b>	<b>{initial volume required}</b>
quota (initial/max)	50MB / 1024MB
volume permissions	system:administrators      rliwdka itecs-admin:lockeraudit      rl [ownerID]                      rliwdka [admin group]                  rliwdka [staff group]                  rliwdk
initial volume name (relative to container)	[containervolume] . prv
initial volume mount (rel. to container)	/private
additional volume name(s)	[containervolume] . v01 .. [containervolume] . v99
additional volume mounts (rel. to initial)	/private/[somemount] (work with owner/admins)
<b>public volumes</b>	<b>{initial volume optional}</b>
quota (initial/max)	50MB / 1024MB
volume permissions	system:administrators      rliwdka system:authuser              rl itecs-admin:lockeraudit      rl [ownerID]                      rliwdka [admin group]                  rliwdka [staff group]                  rliwdk
initial volume name	[containervolume] . pub
initial volume mount (rel. to container)	/public
additional volume name(s)	[containervolume] . v01 .. [containervolume] . v99
additional volume mounts (rel. to initial)	/public/[somemount] (work with owner/admins)
